ABOUT ME

Detail-oriented and performance-driven Computer Science undergraduate with hands-on experience in full-stack web development, software testing, and data analytics. Proficient in MERN stack, Python, SQL, and software testing methodologies. Demonstrated success in building scalable web applications and delivering optimized code with enhanced performance and user experience. Leveraging strong problem-solving skills, testing strategies, and development expertise in building high-quality software solutions.

PORTFOLIO - <https://sazeous10.github.io/Portfolio/>

EXPERIENCE

LINKED IN - <https://www.linkedin.com/in/ranjit-raj-nahak-9abb23231/>

Web Development Intern | INTERNSHALA | 2 MONTHS | Sep 23 - Dec 23

Credential: <https://tinyurl.com/intslweb>

PG Accommodation Booking Platform | React, PHP, MySQL

- Developed a dynamic PG booking website with interactive search, filter, and booking features.
- Built a responsive frontend using React and integrated PHP for backend development with MySQL for efficient database management.
- Optimized performance, improving user engagement by 30% and reducing page load time by 25%.
- Ensured seamless booking operations and enhanced user experience with efficient search functionality.

Data Analytics Internship | IBM CSRBOX | 6 WEEKS | Jun 24 - Aug 24

Credential: <https://tinyurl.com/ibmda>

COVID-19 Data Analysis | Python, NumPy, Pandas, Matplotlib, Kaggle

- Analyzed 50,000+ COVID-19 records to uncover key trends in case progression, vaccination distribution, and demographic patterns.
- Identified states with the highest active cases (15%) and death rates, revealing that 60% of cases were male.
- Developed interactive visualizations (time-series charts, heatmaps, dashboards) for regional trends.
- Utilized Pandas, NumPy, and Plotly for data processing and insights generation.

SKILLS

Python, SQL, MySQL, HTML, Tailwind CSS, JavaScript, React, NodeJS, ExpressJS, MongoDB, Figma, Canva, Git, GitHub, ML, SAP ABAP

PROJECTS

GITHUB - <https://github.com/Sazeous10>

1) Mental Health Prediction using Explainable AI | ML, SHAP, LIME

Dashboard Link - <https://tinyurl.com/mhpredictor>

- Developed a machine learning application to predict mental health conditions with 96% accuracy using an Extreme Gradient Boosting (XGBoost) model trained on survey data from 5,000+ individuals.
- Integrated standard mental health questionnaires (PHQ, GAD, ISI, GHQ, DASS) and facial expression analysis for comprehensive assessment. Utilized SHAP and LIME for explainability, identifying key factors contributing to disorders.
- Implemented interactive visualizations using Matplotlib and Plotly to analyze trends and insights.

2) AI Image Generating Website | MERN, ML

Website Link - <https://imagifyai.netlify.app/>

- Developed an AI-driven image generation website that creates images based on user prompts using a machine learning model from Hugging Faces Community using API keys.
- Built a responsive React frontend with a Node.js and Express.js backend, leveraging MongoDB Atlas for database management.
- Integrated Cloudinary cloud space for image storage and gallery display, enhancing user collaboration and engagement by 15%.
- Deployed the backend server on Render and the frontend on Netlify for seamless real-time hosting.

3) Hospital Management System | MERN

- Built a full-stack hospital management web app using React.js for the frontend and Node.js with Express.js for the backend, enabling efficient handling of doctors, patients, and appointments.
- Implemented full CRUD operations for patient records, doctor profiles, and appointment scheduling, enhancing administrative efficiency.
- Designed a responsive and interactive UI with React and Flexbox, ensuring seamless usability across devices (mobile, tablet, desktop).
- Developed RESTful APIs for robust backend communication and integrated MongoDB via Mongoose for secure data storage and management.

4) Book Library Web Application | MERN

- Developed a full-stack Book Library management system using the **MERN stack** to manage book collections with features like add, update, delete, and search.
- Designed a modern, responsive **React.js frontend** with dynamic book listing, filtering, and intuitive UI using CSS.
- Built a RESTful API with **Node.js and Express.js**, managing requests and routing efficiently for all CRUD operations.
- Integrated **MongoDB** and **Mongoose** for scalable, schema-based storage of book data.
- Used **Axios** for frontend-backend API communication and **dotenv** for secure environment variable handling.

EDUCATION

CSE | PARALA MAHARAJA ENGINEERING COLLEGE BERHAMPUR
XII | KENDRIYA VIDYALAYA PURI
X | KENDRIYA VIDYALAYA PURI

2021-Current | BPUT | CGPA: 8.6 | Berhampur, Odisha
2020-2021 | CBSE | Percentage: 90.6% | Puri, Odisha
2018-2019 | CBSE | Percentage: 92.4% | Puri, Odisha

CERTIFICATIONS

- SAP Certified Associate - Back-End Developer - ABAP Cloud
- Udemy Certified – HTML, CSS, JavaScript, React - Certification
- Web Design Course at GUVI's Skill-A-Thon
- Career Essentials in Generative AI by Microsoft and LinkedIn
- Learn To Create AI Assistant (JARVIS) with Python
